📺 MrStarktastic

Summary

Versatile, quick learner, autodidact and often told to have a skillset comprising an entire tech department. Looking for either a position of Fullstack, DevOps or a mix of both.

Education

2015–2019 **Maths with CS Minor**, *The Hebrew University of Jerusalem*, Israel.

Expected to resume studies via The Open University in Q4 2020.

Coursework:

- Linear Algebra, Discrete Mathematics, Infinitesimal Calculus, Probability Theory
- Data Structures, Introduction to Object-Oriented Programming, Programming Workshop C/C++
- Introduction to Machine Learning, Operating Systems, Nand2Tetris
- Introduction to Technological Entrepreneurship

As a student, I was always the go-to guy if anyone needed help with a programming task.

Achieved high grades in all programming courses.

Experience

May 2020 – **DevOps Engineer**, *Zoomin Software*, Tel-Aviv.

- Present
- Managed Docker containers via ECS that host customer sites
 - Implemented various automations:
 - Postgres log collector that generates graphical reports and sends them to S3 and Slack
 - Site24x7 monitoring agent installer via Rundeck
 - Lambda function triggered by CSV file uploads to S3 which analyzes the data in them with a 3rd party API and appends columns to the files
 - GitHub pipelines
 - Spun up a POC server with Elastic Search Enterprise
 - Wrote infrastructure as code using AWS CDK to facilitate deployment for every new customer

Aug 2017 – **Fullstack Web Developer & DevOps Engineer**, *Gamitee*, Jerusalem.

Apr 2020 First employee in the travel-tech startup.

- Applied significant changes to both the frontend and backend (Node.js) aspects of the web application.
- Led an infrastructure overhaul on AWS from scratch:
 - Scalable and load-balanced servers
 - CI/CD (Jenkins & CodePipeline)
 - Docker containers that simulate a local environment for testing purposes
 - Secured with Dome9
 - Lambda functions as microservices
 - MongoDB/Redis databases
 - Orchestrated with Terraform (Infrastructure as code)
- Built automations and tools that streamlined the development process for others

Skills

- JavaScript, TypeScript, Python
- Swift, Java, Kotlin (iOS & Android)
- C/C++, C#
- Bash, Go

Languages

English Native proficiency with natural accent
Hebrew Native proficiency
Russian Professional working proficiency
